

Technical Installer & Repair | DC - Baltimore - Northern Virginia

[APPLY TO POSITION HERE](#)

OUR VISION

At Chemstar WATER, we aim to be the most customer-centric Water Treatment company in the world. We believe that when we value our customers, our employees, and the environment equally, then we will make the world a better place. That's why we have pledged 1% of our profits and 1% of employees paid time to support our local communities.

ABOUT CHEMSTAR WATER

Founded in 1999, Chemstar WATER is an industrial water treatment company that provides water treatment products, solutions and services to Data Centers, Industrial Facilities, Power Plants, Health Care Facilities, Government and Food and Beverage Manufacturers. Our impact can be seen from the Pentagon in Washington DC, Hospitals in Maryland, the Johns Hopkins University Applied Physics Laboratory to a Data Center in San Francisco. At Chemstar WATER we are committed to minimizing water use and maximizing energy efficiency resulting in a reduced carbon footprint for our World. When we focus on improving the operation of the cooling and boiler systems; we have a direct impact on our customer's water and energy use. In addition, Chemstar WATER has been named one of the Top Workplaces in 2022 by the Baltimore Sun newspaper.

Our ability to Install and Deliver Equipment and Chemicals is what sets us apart and allows us to provide a custom level of service and excellence that keeps our customers coming back. Leveraging in-house expertise in Chemistry, Water Treatment Equipment, and Operations our Technical Installer & Repair Technician partners with customers to extend the lifecycle of their Heating and Cooling equipment and monitor any bacteria.

JOB PURPOSE

The position of the Technical Installer & Repair Technician will have the ability to interact with all Chemstar WATER's customers. This highly technical role will be delivering and installing equipment, partner with the technical engineering teams to design custom customer solutions and be able to leverage their expertise to resolve customer problems. The ideal person must have the understanding or ability to learn and grow their knowledge of Water Treatment terminology, concepts, and equipment. This role will be expected to collaborate closely with the company's Technical and Commercial Teams to exceed our customers' expectations.

CAREER PATH

Every employee at Chemstar WATER is given the opportunity to develop and increase their impact within the company: whether they are becoming a subject matter expert, progressing from an individual contributor to a manager, or moving from a technical field role to a more customer-facing commercial and sales role. The leadership at the company is fully bought into this approach as it is the best way to attract and retain the best talent.
